‘Aussie-made’ sticker instructions

Aussie made stickers on castors
Part number: AUSSIESTICKER

‘Aussie made’ stickers for castors and forks

The ‘Aussie made’ stickers (AUSSIESTICKER) are placed onto the forks so they appear upside-down on the display stand, with the brake pedal pointing to the right (even if there isn’t actually a brake pedal). Stickers are only applied to complete castors or forks, but not to wheels.

Australian-made range

Stickers can be applied to castors in the Fallshaw core range including K, M, J, O and H series, and well as the decorative, scaffold, specialised and medical castors—all of which have more than 50% content manufactured here (and are therefore truthfully ‘made in Australia’ as per ACC trade practices law). This covers our entire ranges between the 50kg to 600kg load ratings.

The L series or the Very Heavy Duty ranges must not have the ‘Aussie made’ sticker, as these are imported. This includes the ranges with load ratings less than 50kg or more than 600kg (or other incidental items that are imported).

Ordering stickers

Not all Fallshaw distributors want the ‘Aussie made’ stickers. If you do not want the stickers on a particular order, then our sales people will enter an order line that omits the stickers.

Once we flag a distributor as ‘yes’ then every subsequent printing slip will have an automatic item code ‘AUSSIESTICKER’.
